

## Life - Hospital Management

Life- Hospital management system covers all the functions of a hospital. It takes account of OP Registration, IP Registration, OP Booking and also provides all types of reports, House keeping, billing etc. To improve the quality of patient care, doctor can view the patient history at each visit.

### Benefits

- ✘ You will require less number of Staff to cater more patients in same time or even less. You would have the choice to re-deploy them at other suitable locations.
- ✘ Hospital Management System not only provides an opportunity to the hospital to enhance their patient care but also can increase the profitability of the organization.
- ✘ Life would enable hospitals or Nursing Homes to serve the rapidly growing number of health care consumers in a cost-effective manner.
- ✘ Life can also save extra money on your current computer hardware shopping. Check up with our executive to more on this.
- ✘ Hospital administrators would be able to significantly improve the operational control and thus streamline operations.
- ✘ This would enable to improve the response time to the demands of patient care because it automates the process of collecting, collating and retrieving patient information.
- ✘ The senior Doctors would spend his precious time more in clinical activities than to put in clerical activities otherwise.
- ✘ This software interface would also save them a lot of time for special jobs only.
- ✘ Accounting sometimes becomes awfully pathetic and complex. This product will eliminate any such complexity, since the retrieval of information through its MIS will become virtually on the tip of your fingers.
- ✘ Very important for some, the reduced cost of the manpower would pay for the cost of this product with in a short time after its implementation.

It contains the following sections :

- A. Administration
- B. Patient information
- C. Doctors
- D. Billing
